

Product line

Design, construction, installation and modernization of complete process stages in sugar factories and refineries; engineering, assistance, machinery and equipment:

Extraction plants, pulp presses and pulp drying plants, fluidized-bed steam dryers, evaporators, continuous and batch centrifugals, sugar drying and cooling plants, pumps

Equipment and services for the starch and food industries, biotechnological and chemical industries:

for the production of starch, glucose, dextrose, fructose, alcohol

Spare parts and engineering services for the North American market

Design and supply of drive systems, design and supply of measuring and control systems, hardware design, software, visualization solutions, switchgear cubicle construction, commissioning, TeleService, retrofitting

High-quality steel and tank construction for agriculture and the food and sugar industries in the USA

Complete processing lines for: french fries, potato chips, granules, flakes, vegetable, snacks, potato speciality products

Washing, slicing, peeling and hulling plants for potatoes, vegetable and fruit

Frying systems and auxiliary equipment

Cooling, freezing and drying plants, cold storage plants for the food industry

Cheese treatment systems

Design, construction, installation and modernization of dryers:

Belt dryers, spray-belt dryers, drum dryers and fluidized-bed dryers, granulated potato plants

Vibration technology for product classification, transport and mixing
